A leading product with unparallelled quality[*1].

The flagship product of Naturally Plus – a derivation of the synergistic combination of the perfected Super Lutein and Mirtogenol®, the latter an international patent ingredient[*2]. It is a multi-carotenoid supplement that adopts the recipe endorsed by Professor Khachik, a leader in the field of carotenoid research.

MULTICAROTENOID MIRTO+ Plus SUPER LUTEIN

AUTHORITY OF THE MULTICAROTENOID FREDERICK KHACHIK

*1 Solely from the viewpoint of Naturally Plus.
*2 According to the PCT international patent application system, a patent filed in a contracting state of the Patent Cooperation Treaty will be recognised across the contracting states.

The 6 carotenoids endorsed by Professor Khachik, supplemented with complementary nutrients

The Golden Recipe of Super Lutein

The 6 carotenoids and "Mirtogenol®" have different properties.
The 6 fat-soluble carotenoids and the water-soluble "Mirtogenol®" come together to bring about greater satisfaction.

Combining two fascinating ingredients to form the perfectly balanced MIRTOGENOL®

PYCNOGENOL®

French maritime pine bark extract

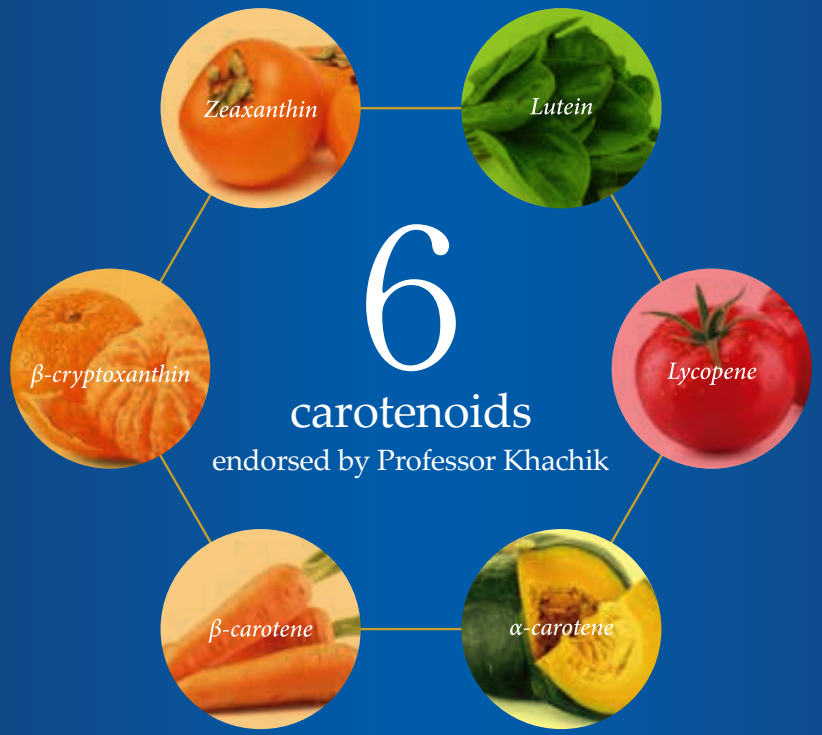
Research has been carried out for over 40 years by Horphag Research, a Swiss company that is also the supplier of Pycnogenol® as a raw material. Powderised using a proprietary extraction process, it contains over 40 types of flavonoids including procyanidin, catechin and phenolic acids.

The <pycnogenol'>, an ingredient in the world spotlight, is extracted within 24 hours of harvesting the French maritime pine bark.

MIRTOSELECT®

Bilberry extract

Mirtoselect® is a proprietary bilberry extract manufactured by Indena of Italy, from freshly ripened bilberries harvested between July and September. Bilberry is a wild species of blueberry, native to Northern Europe. Fresh bilberries contain about 4 times the anthocyanin (a type of polyphenol) of blueberry. Mirtoselect® contains 36% anthocyanin. We support your lifestyle by using only bilberry extract of the highest quality without undergoing chemical treatment.



Capsules contain submicron-sized ingredients

Ultrafine pulverisation for an even better effect

The raw ingredients of Super Lutein Mirtoplus are crushed into submicron-size (one thousandth of a millimetre, which is approximately one-third of the previous size) by an ultrafine pulveriser.

Nutrients that complement the 6 carotenoids

Blackcurrant extract & Bilberry extract

A type of polyphenol that is rich in anthocyanin, which is said to help maintain eye health.

B Vitamins
(B1・B2・B6・B12)

Water-soluble vitamins that are essential for generating energy.

DHA

Found abundantly in fish, and essential to the development of brain and nerve tissue.

Vitamin E

A vitamin that acts as antioxidant, which helps to prevent oxidation in our body.

Super Lutein Mirtoplus is a nutritional supplement with nutrient functions claims (vitamin E).

~Food with nutrient function claims: Vitamin E~
Vitamin E is an antioxidant that helps protect cells in the body.
